

# YASH PANCHAL

## Senior Frontend Engineer | Frontend Lead (React, Next.js, TypeScript, Node.js, NestJS)

Ahmedabad, India | Open to relocation anywhere in India | Immediate joiner

[yashpanchal3210@gmail.com](mailto:yashpanchal3210@gmail.com) | [+91 7990516356](tel:+917990516356) | [linkedin.com/in/yash-panchal-frontend](https://linkedin.com/in/yash-panchal-frontend) | [yashpanchal.dev](https://yashpanchal.dev)

### SUMMARY

Frontend engineer with nearly 6 years building customer-facing B2B SaaS and B2C e-commerce web applications in React.js, Next.js, TypeScript, and JavaScript (ES6+), including 1.5+ years as Frontend Lead of a team of up to 7. Owns features end to end, from requirement analysis and API contract design through testing, deployment, and production monitoring, and builds backend endpoints in NestJS with MySQL when a feature needs them. Strong in performance profiling, component libraries and design systems, microfrontend architecture (single-spa), real-time and asynchronous UI, and accessibility. Equally effective as a hands-on senior IC or as a lead.

### WORK EXPERIENCE

#### Frontend Lead (previously Senior Frontend Engineer), Saleshandy (Ikigai)

Ahmedabad, India | Jan 2025 to Sep 2026

- Owned frontend for revenue-generating features: [CRM/Kanban](#), [Dialer](#) (also shipped as a [Chrome extension](#)), Email Verifier, and AI Sequences (architected its frontend and rebuilt the Sequence builder). Implemented feature flags, role-based route and UI gating, auth token refresh and session expiry, and XSS sanitization.
- Shipped features full stack, building production REST endpoints in **NestJS** with **MySQL** (wrote the SQL queries), Next.js API routes, and Twilio access tokens with webhook callbacks for the Dialer; worked with backend on API contract design.
- Worked in a **single-spa microfrontend** architecture, managing shared dependencies across apps (React singleton, design system, shared state). Built reusable components in React 16 and 19 with TypeScript, with a Storybook library and a shared design system.
- Ran a performance initiative on a heavily constrained legacy codebase, profiling with Chrome DevTools Performance and Memory panels, React Profiler, and bundle analysis. Cut build time **~30%** and raised Lighthouse from **~25 to ~53**; virtualized large CRM lists.
- Built real-time and async flows with WebSockets, Firebase realtime events, and polling for long-running jobs (request cancellation, caching, optimistic updates, retries); managed state with Redux, Zustand, TanStack Query.
- Architected Next.js SSR apps, including a SERP with **~20K** SEO-optimized dynamic pages and dynamic sitemaps. Led a ground-up rebuild of a legacy app onto a TanStack stack with WCAG accessibility built in, breaking 2,500 to 3,000 line components into code-split modules.
- Built sequence analytics dashboards (Recharts, ApexCharts); monitored production with Sentry and Grafana alerts, used PostHog, Matomo, GA4, Mixpanel, and A/B tests to fix drop-off points, and fixed cross-browser issues via BrowserStack.
- Promoted to Frontend Lead within 7 months and scaled the team from **3 to 7** engineers. Set up Jest, RTL, and Playwright E2E specs, ran code reviews and UAT catching 10 to 15 defects per release, wrote SOPs adopted team-wide, and rolled out an AI-first workflow (Claude Max) that lets one developer ship a feature end to end.

#### Front-End Developer, Valens Datalabs Pvt Ltd

Ahmedabad, India | Dec 2020 to Dec 2024

- Owned frontend for a high-traffic B2C e-commerce storefront, building a responsive, mobile-first UI on shared components (React, Recoil, Swiper.js); delivered the initial POC in **one week** as an IC in a 3-person frontend team.
- Improved storefront performance through bundle cleanup and code-splitting, raising Lighthouse from **~55 to ~80** and cutting load time from **5-6s to 2-3s**. Added service workers with caching and a client-side rendering strategy that kept SEO intact.
- Architected a configurable site-builder CMS that let the business create pages and manage catalogue data and orders across order state and fulfilment status, with changes reflected live on the storefront (React, Redux, Material UI).
- Built a customer-journey tracking dashboard and a transcript analysis dashboard charting sentiment and conversation states (React, Redux, D3.js), with list virtualization for large data sets.
- Rebuilt the routing architecture for an internal inventory management portal (Data Quality Portal) used to review and correct inventory data issues, and resolved key frontend bugs across it.
- Led the CMS team through Agile sprints, mentored 2 junior developers on code quality, and handled client communication.

### TECHNICAL SKILLS

**Languages & Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, DSA (data structures and algorithms), async programming

**Frontend & State:** React.js, Next.js (SSR, API routes), TanStack Router, microfrontends (single-spa), Storybook, Redux, RTK Query, Zustand, TanStack Query, Recoil, React Native, SvelteKit, WebAssembly (working knowledge)

**Backend & APIs:** Node.js, NestJS, MySQL, REST API design, API contract design, WebSockets, Firebase realtime events, Twilio webhooks and access tokens, polling, caching, optimistic updates, retries

**Styling & UI:** SCSS/SASS, Tailwind CSS, styled-components, Emotion, MUI, shadcn/ui, Bootstrap, responsive, mobile-first, BrowserStack

**Performance & Monitoring:** Chrome DevTools, React Profiler, Lighthouse, bundle analysis, code-splitting, service workers, Sentry, Grafana

**Data Viz & Analytics:** D3.js, Recharts, ApexCharts, GA4, Mixpanel, PostHog, Matomo, A/B testing

**Testing, Build & CI/CD:** Jest, React Testing Library, Playwright, Git, Webpack, Vite, Babel, GitHub Actions, Jenkins, GitLab CI

**Accessibility & Security:** WCAG (semantic HTML, ARIA, keyboard nav, contrast, screen readers), RBAC, feature flags, auth/session, XSS

**Cloud & AI Tooling:** Vercel, Netlify, AWS (basic), Claude Code, Cursor, MCPs, agent-driven development

### EDUCATION

B.E., Computer Science Engineering, Government Engineering College, Patan

May 2018 to Apr 2021 | CGPA: 8.03/10
